**Importance:** High

Hi Nathalie-

Updates removing the suite and making a few edits to the annotated agenda. One item we should add to the draft agenda for the Alt Reps call is to agree on the questions that will be used to guide the Ministers' dialogue with the expert panel. We had floated these questions in January and did not get feedback from Canada or Mexico (do you recall otherwise?). I think it is important to get Alt Reps to agree on these or revised versions.

It would be great if we can put them in a document for discussion at Alt Reps. These are the current draft questions:

DRAFT questions (to be considered/confirmed by Alt Reps in June 8 call):

- How are federal and State/Provincial Policies or initiatives promoting or supporting innovation and partnerships for green growth? Examples may include the areas of agriculture, manufacturing, transportation, ecotourism, technologies, efficiencies and green job creation.
- How are public-private partnerships advancing green growth?
- What are examples of successful partnerships for green growth and how could these become models or be replicated in other geographic areas or sectors?
- What are opportunities for Canada, Mexico and the U.S. to promote these practices continent-wide and support our green growth and trade while protecting the environment and ecosystems in North America?
